Projects

iOS App, SJSU, Fall 2020

A social media app designed to allow students in university to join others in a start-up.

- Assumed the role in planning the design of the app.
- Brainstormed ideas for the app and combined them all to design the user experience as well as the functionalities using the language Swift.

Real Estate Python App, SJSU, Fall 2020

A python application that obtains user preferences for a home in order to return top 3 homes that fit the criteria.

- Worked on user interface using python grid layout to obtain the preferences of the user.
- Created a function that passed the information to the web crawler file.

Certificates

Responsive Web Design, FreeCodeCamp (December 2020 – Present)

Additional Experience

Immigration Center at Sacred Heart Community Service, San Jose, CA, Fall 2017

Volunteer:

- Helped inform San Jose residents of the immigration services available to them.
- Collaborated with other volunteers and workers to create and improve new events that will benefit the immigrant community.
